My name is Bill. I work in an old zoo. There are many farm animals in our zoo. We also have some wild animals such as Iranian cheetahs and African lions. Last year, we had three Iranian cheetahs in our zoo. Sadly, we lost one of them. Because they lived in small cages. This year, we are making new cages for them. I think these large cages will be nice places for them. I hope many visitors from different countries will visit the zoo.

The human heart is an amazing organ of the body. It is an organ that pumps **life-giving liquid** all around the body. Our heart is a big muscle. Heart like brain is one of the most important organs of our body. Both of them work together to make us stay alive. Like all muscles, our heart can move. It becomes bigger and smaller all the time. This is our heartbeat. Our heart pumps blood to all parts of the body. It pumps 100,000 times a day in every day of a person's life. Our heart pumps this red liquid to collect oxygen from the air. Next, blood goes from the heart to different parts of our body. This helps us stay alive.
